PROJECTS

ResuFusion - Resume Builder | React JS, Express Js, MongoDB, Tailwind CSS

April 2025

- ResuFusion is a dynamic resume builder built with the MERN stack that allows users to create, edit, preview and download professional resumes with a clean PDF layout in real-time.
- Features a multi-step form, live preview, and multiple sections including education, experience, projects, skills, and more.
- Built with a responsive UI using React and Tailwind CSS, local state persistence, and the ability to edit saved resumes stored in MongoDB.
